LABORATORY ANALYSIS C.O.U.		Rev. 02 28/11/2016	Page 1

INSTRUCTIONS FOR SEMEN COLLECTION

SEMEN ANALYSIS, SEMEN CULTURE

The test is performed only after requesting an **appointment** directly or by telephone at the Laboratory Analysis number for Monselice (Schiavonia): 0429/71 5337

Collect the sample after a period of sexual abstinence, preferably 3 - 5 days

Drink one or two glasses of water and, after urinating wash your hands and external genitals with soap and water.

The sample is collected by masturbation, without a condom.

Enter **all** the seminal fluid into a sterile *wide-mouth* plastic container with a (airtight) screw or pressure cap;

NB Close the cap of the container securely.

Wrap the container in cotton wool and then in aluminum foil in order to maintain the sample's temperature constant.

Identify the sample by writing your full name and time of collection.

The sample must be accompanied by your medical history form given at the time of booking or according to the agreement with reception.

Deliver the sample to the Sample Collection Point within 30 minutes from collection being very careful to prevent any thermal shock by keeping the sample at a temperature not lower than 15°C and not higher than 30°C.
